We have made some core changes to the game that you can read about below. Some of the new gameplay features include: Direct Kicks Now Available: A direct kick can be used any time a player controls the ball beyond the penalty box. Player List Enabled: Players can now switch positions and work their way through the player list. New Player Control: Players can now be played as if they are a ghost – meaning the real player's head moves, but they cannot control the ball. As the gameplay advances, this allows players to control players the same way they would control players in real life. For example, you can control players in the same way in a midfield position as you do in an attacking position. Air Pass and Cross: Players can now handle the ball by using both feet in the air. Once a player has successfully received a pass, they can now pass it on to a teammate. We are adding a new air pass animation. New Players: Our game engine bc9d6d6daa
